

Hunterdon Regional Cancer Center’s Family Risk Assessment Program (FRAP)

For individuals with a family history and/or personal history of cancer.

Through FRAP, individuals and families can learn more about their risk for certain types of cancer. Individuals found to be at increased risk receive specific recommendations for risk management and risk reduction.

	Have YOU ever had (including currently) any of the following?	Have any of your FAMILY MEMBERS ever had (including currently) any of the following? <i>Think about blood relatives in your generation, two generations before you and one generation after you.</i>
Breast cancer before the age of 50	Yes_____ No_____	Yes_____ No_____
Ovarian cancer at any age	Yes_____ No_____	Yes_____ No_____
Cancer in both breasts or breast cancer more than once	Yes_____ No_____	Yes_____ No_____
Male breast cancer at any age	Yes_____ No_____	Yes_____ No_____
Breast cancer at any age in a family with Eastern European Jewish ancestry	Yes_____ No_____	Yes_____ No_____
Colon or rectal or uterine cancer before the age of 50	Yes_____ No_____	Yes_____ No_____
Colon or rectal cancer more than once	Yes_____ No_____	Yes_____ No_____
More than 10 colon polyps (all exams combined)	Yes_____ No_____	Yes_____ No_____
If you have had breast cancer yourself, was the pathology called “triple negative breast cancer”?		
Yes_____ No_____ Uncertain_____ N/A_____		

If you answered “yes” to any of these questions, you or your family members may be at increased risk for certain kinds of cancer. For additional information and/or to schedule an appointment, please call the Family Risk Assessment Program at (908) 788-2535.

If you are not interested in discussing this risk with Hunterdon’s FRAP, we encourage you to discuss your history with your healthcare provider.
