# LEAD-SAFE HOME REMEDIATION GRANT PROGRAM

---

## Take the *Lead* on Lead.

*Studies have found inhaling or consuming lead is extremely harmful, especially to children and pregnant women.*

### How We Help:

Mercer County residents who suspect lead contamination can now receive assistance through New Jersey's *Lead-Safe Home Remediation Grant Program*.

This program educates residents about the dangers of lead poisoning, shares information about lead remediation and helps those who fear or may have confirmed lead contamination in their homes.

### Program Offerings:

Eligible Mercer County residents can receive:

- Preliminary lead testing to determine if lead is present
- Lead inspection and risk assessment of your home
- Remediation of lead-based paint hazards via interim controls (i.e. painting, cleaning, repairs, etc.)

If lead is detected, residents may be eligible for help and guidance on how to properly remediate any lead-based paint hazards.

## Eligibility:

Mercer County is currently accepting applications to the *Lead-Safe Home Remediation Grant Program*.

Applicants must meet certain property and income eligibility guidelines:

- **Income Guidelines**
  - Participants should be low- to moderate-income homeowners or tenants
  - The homeowner/occupant and/or the tenant household's gross income should not exceed 80% of Area Median Income in their respective home counties
- **Property Guidelines**
  - Consist of one (1) to four (4) units
  - Built prior to 1978
  - Must have a presence of lead-based paint hazards

*PLEASE NOTE: Documentation is also needed to verify that the above guidelines are met.*
